

# Data Warehouse as a Service

## SCOPE OF DELIVERY

- one complex service
- one set of SLA
- one invoice

## KEY CHARACTERISTICS OF THE SERVICE

- Fully automated performance tuning
- Fully automated hardware resource elasticity
- SLA: 99.995% UpTime = high reliability and availability
- Oracle Exadata = high performance & optimal costs
- Data Encryption, Network Security and Access Control, Auditing, Encrypted Connection = maximal security.

Transfer the responsibility for creating and operating the Data Warehouse to us. ADWnow! is a delivery of Data Warehouse as a Service.

## Key Benefits :

- Low or zero investment costs.
- Very low operational costs.
- Short delivery schedule.
- Quick service expansion when a change is required.
- Fully auditable.

ADWnow! Service is based on Oracle Cloud platform which provides:

- High level of data security.
- Immediate scalability for performance gains.
- Service high reliability and availability.
- Best of the breed Oracle tools at a fraction of price.

The service can be supplemented with a Manta Flow – a platform for Unified Data Lineage.

A diagram showing the service architecture. At the top, a dark teal banner contains the "ADWnow!" logo and the "neit.consulting neit:group" logo. Below this, the "ORACLE Cloud Platform" is shown with three icons: a hand holding a server rack (labeled "complete infrastructure automation"), a cloud with arrows (labeled "automated data center operations and machine learning"), and a database cylinder with a gear (labeled "complete database automation"). To the right of these icons is a dark teal box with the "MANTA" logo and the tagline "Navigate the ocean of enterprise BI".
